

Mac's Monthly Advice!

Hey there! Mac is back again with some tips to help you make it through the dog days of summer!

Stay cool and save!

Manage your thermostat at home when you are away. Set your programmable thermostat during the day about 7-10 degrees higher and turn on your fans. You'll see the savings on your monthly bill as it is less costly to run your fans than to turn down your AC!

Stay local!

Travel sometimes can be expensive. We are lucky to live in Florida with an array of opportunities to entertain us. Either take road trips and explore our beautiful state or stay local and take trips to the beach, explore our fun attractions or go rugged and check out our campsites. All of these adventures are much less expensive than flying across country!

I'll be back next month with a few more tips...
Until then, have fun in the sun!
