

Mac's Monthly Advice!

Hey everyone, Mac is back with a couple helpful tips on making the most out of your \$\$\$

Automate your money.

Set up a computer system to automatically put your money into different accounts and to pay bills.

Save more than you spend.

Try to live below your means, put as much of your income away into savings and retirement accounts. That way you will be set for both a rainy day and for retirement.

Bank any extra cash.

Take holiday or birthday cash, bonuses, or even your change jar and put that money in the bank where it's harder to spend on impulse purchases.
