

# Mac's Monthly Advice!

*BOO! Don't be afraid to tackle your financial planning. Mac here with some helpful tricks and treats to celebrate Financial Planning Month with Dolaghan Law!*

1. Coupons are cool! Take advantage of great deals on things you were already going to purchase by checking the mail and the Sunday paper for coupons. You can also sign up for coupon deals online with many retailers and stores.

2. Eat some homemade lunches. Working a fast paced job or working from the road can add pounds of stress and excessive food expenses. Take your lunch with you when you can, and see just how much those daily lunches are really costing you.

3. You can still indulge occasionally. Go to a game or catch a movie once in awhile. Remind yourself that you're budgeting for a reason-when you don't have as much debt, you can indulge more frequently.

4. Keep your head up. Stay positive when you're working through your financial planning woes and tightening your budgeting up. There are resources out there available for you to help you attain your financial planning goals!
