

Mac's Monthly Advice!

Hey there! Mac here with some tips on what to look for when you're buying a vehicle after a hurricane! Here are some signs that the deal you think you are getting may be a more of a lemon than a lucky find!

Caked-on mud and a musty odor from the carpets. New carpets in an older vehicle may be another red flag.

A visible water line on the lens or reflector of the headlights.

Mud or debris trapped in difficult-to-clean places, such as gaps between panels in the trunk and under the hood.

Rusty exposed screws under the dashboard. Unpainted metal in flood cars will show signs of rust.

Rubber drain plugs under the car and on the bottom of doors that have been removed. That may have been done to drain floodwater.
