

Mac's Monthly Advice!

Whew! Mac here and it's getting HOT, which means it's summertime! Stay cool this summer with these money-saving tips!

Grill more = chill more

Eating at home more this summer instead of eating out can save you hundreds of dollars each month. Take advantage of the weather and the convenience of being able to stay home and bust out the grill for some home cooking.

Watch the thermostat, NOT the thermometer

The heat can be tough to beat, but you can save a bundle by setting your thermostat higher during the day when you aren't home. A difference of around 8 degrees can mean a bigger difference on the monthly bill.

Find some frugal activities for the kiddos

A great time can be had enjoying summer activities without breaking the bank. Check with your child's school or local community message boards for fun and frugal youth activities available for children locally.

Catch that summer blockbuster on your time

Summer is the season of big-time Hollywood movies of all kinds. It's an annual tradition to catch a feature flick during the summer with friends or family. Save a little more by waiting a couple of weeks and catching a matinee. It's cheaper and odds are that you and your movie-going companions will get to experience the magic of the cinema practically all to yourselves!
