

Mac's Monthly Advice!

Mac here with some tips on having some family fun this summer without breaking the bank!

Take a road trip

Hitting the road this summer can be just what the doctor ordered. Taking a spontaneous road trip is a way to enjoy travel without time constraints or excessive budgeting. Visit friends and family, take a drive up the coast or just see where the road takes you!

Go camping

Enjoy the great outdoors and spend a night or two under the stars. There are thousands of campgrounds across the US, and there are plenty of campgrounds here in Florida as well.

Visit a national park or national forest

Depending on the time of year, national parks can offer great times at reasonable prices. There are many different categories of national parks as well, from scenic trails to military battlefields, even seashores!

Take a trip with some friends

Sharing in the fun means sharing in the costs! You can have more fun for less money when you share your trip with friends!

Staycations are still vacations

You can also save money this summer by staying local. Enjoy the beauty and fun of Jacksonville without spending on hotels and resorts!
