

Mac's Monthly Advice!

Hey everybody, Mac here and the heat of summer hasn't let up yet! Here are some cool ideas to save you money and keep the heat off your bank account!

Plan your meals in advance!

This will help you avoid impulse buys when you are at the store. And when it comes to stores, check out discount stores like Costco & BJ's and buy in bulk when you can. This will help you save money as well. If you really can't avoid wandering the aisles when you shop, try buying your goods online. Many retailers offer free shipping or even home delivery!

Speaking of meal planning...

take advantage of restaurants that offer free meals for kids, or special family night offers. This way you can still enjoy eating out occasionally without having to break the bank. And while you're out with the kids, you can also take advantage of other free activities like museums, parks, libraries, and beaches.

You can also add some fun, family-friendly hobbies and activities to the list!

Gardening is a low-cost way to enjoy family time together and also grow food -- which leads to saving money on groceries and creates a great environment for families to share time and celebrate harvests together!
