

# Mac's Monthly Advice!

*Hey there! Mac here with some sage advice for you new investors! You may be excited to take advantage of the current economic boom, but there are a few things to think about before you just start throwing money into investments.*

## ***Be Diverse!***

Don't put all your financial eggs in just one basket. Spread your investments around a little. Do your research and invest in a variety of fields and in a variety of ways--mutual funds, stocks, bonds, and other options can be lucrative in the long run. Speaking of the long run...

## ***Be Patient!***

Don't let a dip in the market scare you into an early withdrawal. Market fluctuation is a common occurrence, so an ebb and flow in your investment return is expected.

## ***Be Aware!***

Investments are always better if you manage them properly. Don't go into autopilot and think that you'll end up fine financially. Pay attention to market trends and adjust your portfolio accordingly.

## ***Be Fearless!***

It's ok to have trepidation when it comes to investments, but don't let fear control your ability to earn a great return. Not everything you do will always turn a profit, but with patience, due diligence (and a little luck) you can set you and your family up for an excellent retirement!
